

This complete, seamless protective all rubber finish damp-proofs, provides an ENERGY STAR™; bright white reflective surface for your concrete roof that instantly cools and can reduce peak energy cooling demand by up to 15%, simultaneously blocking 100% of the damaging UV from reaching your original roof. This solution is best when minimal work is required and the performance relies on the integrity of the existing roof.

ClearSeal™ This penetrating, clear, thin primer is used to prepare porous, non-painted masonry and concrete for sealing with Topps Seal® and other coatings. ClearSeal™ absorbs and bonds light surface oxidation and forms an initial seal beneath the surface. Prepares oxidized or chalked surfaces so they may be coated over with excellent adhesion by a sealant like Topps Seal. ClearSeal™ applies at approximately 0.4 - 0.6 liter per square meter. The coverage will depend on usage.

- Primes uncoated masonry/concrete
- Absorbs and binds slight chalkiness
- Temporary water repellency

MultiUse Cleaner™ economical, alkaline-based cleaner is incredibly versatile. As perfect for heavy duty jobs as it is for use in regular cleaning, a simple change of concentration turns the formula into a cleaning powerhouse that can be adapted for most any project. Topps MultiUse Cleaner Concentrate has been proven effective in a variety of commercial and industrial applications. It will cut through grime across a variety of conditions.

The carefully designed formula combines 10 ingredients - twice that of most ordinary cleaners. Three uniquely different surfactants and an active wetting agent carry the cleaner deep between dirt particles, where it rapidly begins to dissolve the grease, oil, and other airborne pollutants which bind grime to surfaces. The dirt then releases as particles suspended in water, where it simultaneously is removed while washing, without requiring a rinse in most applications.

BondIt™ is the perfect bonding product for use on your bituminous system. The unique chemistry of BondIt™ strongly adheres Topps Seal® to the bitumen while simultaneously providing a layer of protection against color bleed-through. Apply as a single coat to all well-adhered bitumen, before fixing any problems or applying any coatings.

- Instantly blocks color bleed-through from underlying bitumen
- Assures maximum color development and reflectivity of the top coating
- Enhances Topps Seal® adhesion to BUR, ModBit and other bituminous surfaces
